

Brembo Pro Series Race Kit

Using its successes in endurance racing Brembo Racing engineers have developed a dedicated kit for one of the most demanding classes of road racing in America – NASA's American Iron and American Iron Extreme. The Pro Series kits include Brembo Pro Series Racing 4-piston calipers, Pro Series Racing slotted rotors, BRP Racing pads and necessary brackets & hardware.

FEATURES OF BREMBO RACING PRO SERIE KIT

- 4-piston Brembo racing calipers
- Slotted 355mm racing discs
- Brembo Racing pads
- Lightweight aluminum bells
- All caliper brackets and attachment hardware included

CALIPERS

- Proven, multiple championship winning, Brembo Racing design
- 2 piece construction, machined from Brembo racing specific billet alloy
- Quick-change pad retention
- High temperature, severe duty Brembo Racing seals
- Anodized, easy to clean surfaces
- Extra thick 25mm pads
- Full line of service parts available

APPLICATIONS

American Iron, American Iron Extreme, Time Attack, Track Day and other Club applications.

FEATURES OF BREMBO RACING PADS

For specific applications

Brembo introduces its line of friction materials to meet the needs of today's racing cars. These high torque race compounds are designed to have high friction levels at a wide range of temperatures, high sensitivity to pressure modulation, and high temperature fade-free performance. Brembo's special materials consist of metallic compounds with blended carbon and graphite particles to provide a high temperature lubricant base. The result is smoother, predictable and consistent brake engagement along with exceptional release characteristics not found in most racing friction materials.

BENEFITS

- Superior high temperature, fade free performance
- Great pressure sensitivity for excellent modulation
- Higher friction levels for shorter stops
- Better release characteristics for less drag

Brembo Brake fluid LCF 600 plus

Brembo Racing LCF 600 is specifically formulated to provide the highest level of performance under all racing conditions. High resistance to temperature combined with unmatched compressibility make LCF600 one of only a few brands of brake fluid found in today's highest levels of racing.

Brembo Racing Caliper Service

Brembo offers complete rebuild and testing services for Racing calipers and master cylinders by factory trained personnel.
